Also, if Applicants elect one of Groups VII-XI, please elect a single SEQ ID NO from the group consisting of SEQ ID NO: 64 and SEQ ID NO: 66.

According to PCT Rule 13.2 and to the guidelines in Section (f)(i)(A) of Annex B of the PCT Administrative Instructions, all alternatives of a Markush Group must have a common property or activity. The polypeptides of, polynucleotides encoding or complementary to, and antibodies to SEQ ID NO: 2, SEQ ID NO: 4, SEQ ID NO: 6, SEQ ID NO: 8, SEQ ID NO: 10, SEQ ID NO: 12, SEQ ID NO: 14, SEQ ID NO: 16, SEQ ID NO: 18, SEQ ID NO: 20, SEQ ID NO: 22, SEQ ID NO: 24, SEQ ID NO: 26, SEQ ID NO: 28, SEQ ID NO: 30, SEQ ID NO: 32, SEQ ID NO: 34, SEQ ID NO: 36, SEQ ID NO: 38, SEQ ID NO: 40, SEQ ID NO: 42, SEQ ID NO: 44, SEQ ID NO: 46, SEQ ID NO: 48, SEQ ID NO: 50, SEQ ID NO: 52, SEQ ID NO: 54, SEQ ID NO: 56, SEQ ID NO: 58, SEQ ID NO: 60 or SEQ ID NO: 62 lack common structure.

Also, the polypeptides of, polynucleotides encoding or complementary to, and antibodies to SEQ ID NO: 2, SEQ ID NO: 4, SEQ ID NO: 6, SEQ ID NO: 8, SEQ ID NO:

10, SEQ ID NO: 12, SEQ ID NO: 14, SEQ ID NO: 16, SEQ ID NO: 18, SEQ ID NO: 20, SEQ ID NO: 22, SEQ ID NO: 24, SEQ ID NO: 26, SEQ ID NO: 28, SEQ ID NO: 30, SEQ ID NO: 32, SEQ ID NO: 34, SEQ ID NO: 36, SEQ ID NO: 38, SEQ ID NO: 40, SEQ ID NO: 42, SEQ ID NO: 44, SEQ ID NO: 46, SEQ ID NO: 48, SEQ ID NO: 50, SEQ ID NO: 52, SEQ ID NO: 54, SEQ ID NO: 56, SEQ ID NO: 58, SEQ ID NO: 60 or SEQ ID NO: 62 share no special technical feature as the polynucleotides, particularly the complementary polynucleotides are not required for the polypeptides and instead encode polypeptides that would not elicit the antibody to the polypeptides.

The inventions listed as Groups I-XI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. Russell et al. (WO/2000/23596, see IDS) teach a compound, i.e., inhibitors such as cholesterol (5-cholesten-3fl-ol), cholestanol (5et-cholestan-313-ol), epicholesterol (5-cholesten-3a-ol), coprostanol (5[3-cholestan-3[3-ol), desmosterol (5,24-cholestadien-313-ol), [3-sitosterol (5-cholesten-2413-ethyl-313-ol), 25-hydroxycholesterol (cholest-5-ene-313, 25-diol), and 27-nor-25-oxocholesterol (27-nor-

25-oxo-5-cholesten-313-ol), which inhibit the activity of cholesterol 25-hydroxylase (CH25H) (see page 20 under "Measurement of cholesterol 25-hydroxylase activity in cell lysates", and page 23 under "Inhibitor Studies"), which corresponds to the limitation of claim 1, in the recitation of

"A prophylactic/therapeutic agent for respiratory diseases, comprising a compound or its salt that inhibits the activity of a protein comprising the same or substantially the same amino acid sequence as the amino acid sequence represented by SEQ ID NO: 2, SEQ ID NO: 4, SEQ ID NO: 6, SEQ ID NO: 8, SEQ ID NO: 10, SEQ ID NO: 12, SEQ ID NO: 14, SEQ ID NO: 16, SEQ ID NO: 18, SEQ ID NO: 20, SEQ ID NO: 22, SEQ ID NO: 24, SEQ ID NO: 26, SEQ ID NO: 28, SEQ ID NO: 30, SEQ ID NO: 32, SEQ ID NO: 34, SEQ ID NO: 36, SEQ ID NO: 38, SEQ ID NO: 40, SEQ ID NO: 42, SEQ ID NO: 44, SEQ ID NO: 46, SEQ ID NO: 48, SEQ ID NO: 50, SEQ ID NO: 52, SEQ ID NO: 54, SEQ ID NO: 56, SEQ ID NO: 58, SEQ ID NO: 60 or SEQ ID NO: 62, its partial peptide, or a salt thereof."

It is noted by the Examiner that [i] Applicants' SEQ ID NO: 2 is the amino acid sequence of CH25H, and [ii] the recitation of "for respiratory diseases" in the preamble is not given any patentable weight since it only recited the intended use of the agent. Therefore, the shared technical feature of the groups is not a "special technical feature", unity of invention between the groups does not exist. Furthermore, the shared technical feature between SEQ ID NOs does not exist because each SEQ ID NO represents a structurally and functionally different polypeptide.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Because these inventions are unrelated and distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and the literature and sequence searches required for each of the Group is not required for another thereby presenting a search burden on the Examiner, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
